If credit has not already been established with us, please send satisfactory references or payment in full with order. Packing at cost.

We do not make C.O.D. shipments.

SHIPPING

Give shipping instructions and specify date, or we will forward and ship to best of our judgment, without assuming responsibility. Plants become your property upon delivery to transportation company, and we cannot be liable for loss, damage or delay in transit. Should this occur, file your claim at once directly with the carrier, but notify us so that we can assist you in making claim.

MOTOR FREIGHT AT CUSTOMER'S REQUEST AND RISK ONLY.

GUARANTEE

We guarantee any plant we sell to be true to name and any nursery stock which may prove untrue to name, we will replace. If plants are received in good condition by the customer, our responsibility ceases. We cannot replace stock lost by causes over which we have no control. Claims for any cause must be made within five days after receipt of stock.

ORDERING

Planting seasons are of necessity very short. Orders can be sent in well ahead of the shipping season. We will ship promptly at planting time or on any date specified. All plants are carefully packed and should be removed from the box and planted without delay.

ON WILL CALL ORDERS to be picked up at our nursery—we must have THREE DAYS NOTICE.

Your order will be acknowledged when received.

PERENNIALS

Since "PERENNIALS ARE OUR ONLY BUSINESS" we now can offer an even broader selection of herbaceous plants. We are especially pleased to introduce: members of the HEATH and HEATHER families; some of the old familiar HERBS; the succulent SEMPERVIVUMS; plus other items which should pique your interest.

Our success in the control of NEMATODES is an example of the modern methods being used effectively in our nursery today. For the past three years we have been working with Mr. J. D. Wilson, Professor of Plant Pathology in Ohio Agricultural Experiment Station, and Mr. R. Partyka, Extension Plant Pathologist at Ohio State University, on nematode control. We now "gas" not only our potting soil and bedding areas, but the entire acreage we plant each year. The results have been phenomenal.

More About Perennials

To avoid repetition in the catalog, we suggest here, a common sense rule on soil for perennial plantings. Use well drained soil, rich in Potash and Phosphorous (for root and stalk development) and moderately rich in nitrogen (to assure flowers, rather than over-developed leaves and stems).

With imagination most everything in our catalog can be planted in the perennial border as long as rules of likes and dislikes of the plants are observed.

FALL PLANTING is recommended only when planted early enough for the plant to become established. September 15th to October 15th is the ideal time for fall planting. To avoid heaving during winter a porous mulch should be used, such as soybean straw, pine needles or any coarse mulch which does not pack down or become soggy. **Air must circulate.** A mulch is used not to keep the plant from freezing, but to keep the already frozen plant from constantly freezing and thawing. The listed items are better planted in the fall.

ACONITUM, POPPY, PEONY, HELLEBORUS, CIMICIFUGA

SPRING PLANTING should be made as soon as possible in the spring. Your planting should be completed by the first of May. The following items are better planted in the spring:

JAPANESE ANEMONE, FUSCHIA, HELIANTHEMUM, NIEREMBERGIA, PENTSTEMON Firebird, PENTSTEMON Garnet, TRITOMA, LITHOSPERMUM, GEUM, CHRYSANTHEMUMS.

NOTE: As our perennials burst into bloom we are collecting colored snapshots. These will be available to our customers by fall at a nominal charge. Inquiries invited.

OUR AIM

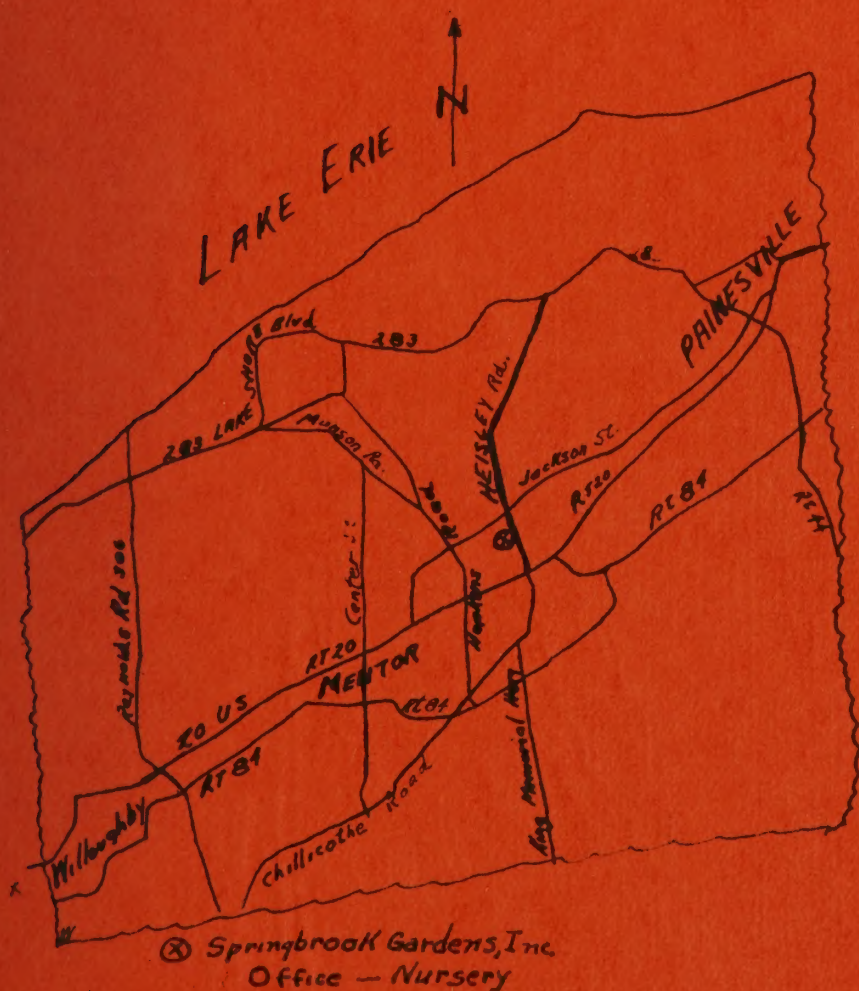

We believe that the best way to build a lasting and pleasant business is to produce the best plants possible and to sell them at a reasonable price.

When you receive a shipment of plants from **SPRINGBROOK GARDENS, INC.** they will be carefully packed, all of an even grade of the very finest quality, freshly dug from the fields. Throughout the flowering period we go through our nursery removing any plant that is not true to name. At digging time when your order is filled, we use only plants which come up to our own exacting standards.

To maintain high standards, the income per acre is reduced but we know that prices must be reasonable to encourage larger plantings of our products. We depend a great deal on our customers recommending our products to others who are interested in flowering plants.

Your continued good will is essential to our continued success.

New office located at the nursery on Heisley Rd., just $\frac{1}{4}$ mile north of Route 20.
